Would you like to be the next dorm-room entrepreneur like Mark Zuckerberg (FB) or Reshma Saujani (Girls Who Code)? Then you will need to learn the language of tech startups: code. Start building your front-end web coding skills (HTML/CSS in CIS 110) and your business skills (in BA 101) by joining this FIG. Startups from the Ground Up will provide students with practical experience and insight into the world of technical startups and becoming an entrepreneur.

**Fluency with Information Technology**

The goal of CIS 110 is for you to understand enough about computational thinking that you could come up with a new idea of how to use computation to solve your own problem, or understand someone else’s new idea on how to use computation, and see its value. From logical thought to programming, database concepts to website architecture, information privacy and security to networking and multimedia, CIS 110 is designed to help you understand how computational thinking can be used to transform information into knowledge in your field of study.

**Introduction to Business**

This course is designed to challenge you to learn about private enterprise and to better understand how organizations operate within that environment. The course will help you understand the economic dimensions of your life and your four roles in the private enterprise system: consumer, employee, owner and citizen. To make informed decisions in each of these roles, you need to understand both the basic principles of the system and its complexity. You will begin building your understanding by studying the kinds of decisions that are made in organizations, the models managers use to help them make the decisions and how those decisions are shaped by the competitive environment.

**NEXT STEPS**

After you're registered for your FIG, you will want to check out the Meet Your FIG page [here](https://fyp.uoregon.edu/fall-2022-fig/). This page will have everything you need to know before the beginning of fall term, including how to email your FIG Assistant, your summer assignment, and when you will be meeting your FIG for the first time in September. In order to prepare for your coursework and be notified about important academic deadlines you will want to download the "Canvas" and "Navigate" apps to your devices. Also, be sure to visit the FYE Community page in September, which has all the resources you'll need to achieve success in your first-year. If you have questions about anything, make sure you email your FIG Assistant – they are here to help!
