About the FIG:

How does transportation affect climate change? What can cities and residents do to promote sustainable transportation? This FIG uses Eugene as a laboratory to examine how transportation affects climate change and what to do about it. Considers the politics and equity implications of shifting to greener ways to travel. We will explore the city by bicycle, bus, and foot through fun activities and field trips throughout the term. We'll examine recent investments in bus rapid transit and bicycle infrastructure in the city of Eugene to connect it to the concepts we discuss in courses.
