

THE FUTURE WE WANT TO BUILD

Academic Team:

First-Year Experience Seminar Instructor

Sarah Stoeckl
sstoeckl@uoregon.edu

FIG Assistant

Kerry Kantscheidt
kkantsch@uoregon.edu

Next Steps:

1. Learn more about your FIG by visiting its page (linked below)
2. Complete your Fall Term Checklist
3. Follow uofigs and uo_fye on instagram

@uofigs
@uo_fye

About the FIG:

When it comes to global climate change, we don't have a data or science problem, we have a storytelling one. In this FIG we will read stories of a climate-changed world or "cli-fi" and investigate how those stories impact us and others. We will also examine some of cli-fi's sub-genres and concepts including post-apocalyptic, dystopian, hope punk, and solar punk, and learn about current and future solutions to climate change. This FIG will also emphasize environmental and climate justice, recognizing that the impacts of climate change are unequally distributed. In the FIG course, you will have an opportunity to share your own story of living in a warming world. For the final project we will bring it all together as we co-create our own science fictional vision of the future we want to build. In this FIG you will get to expand your abilities in critical thinking, climate change impacts and solutions, imagination, and creativity. The courses in this FIG will give you information and insight into our changing world and what people are doing about it. While we will be authentic about the very real challenges we face with global warming, including the fear, grief, and anger that come with these challenges, we will ultimately focus on shaping a different story—one of solutions and productive transition to a just and sustainable world.
