

The Problem with Problems

Academic Team:

First-Year Experience Seminar Instructor

Randy Sullivan
smrandy@uoregon.edu

FIG Assistant

Jasmine Marquez Cuanas
jmarqu10@uoregon.edu

Next Steps:

1. Learn more about your FIG by visiting its page (linked below)
2. Complete your Fall Term Checklist
3. Follow uofigs and uo_fye on instagram

@uofigs
@uo_fye

About the FIG:

Have you had a rocky relationship with science and math problems? Do your knees start to shake when you see a problem that's longer than a single short sentence? In college, success in a science or math course depends, to a great extent, on your ability to solve complex problems. The exams that you will take and the homework you will complete contain a lot of tough problems.

In "The Problem With Problems," you will begin to learn the skills that you need to tackle those tough problems. We will start by taking a look at why problem-solving plays such an important role in science and math learning. At the same time, we will work on improving your problem-solving skills and help you learn to leverage your problem-solving so that you can master the big concepts behind the problems.
