ABOUT THIS FIG

College Connections

Students in this FIG will explore ways in which Anthropology and Environmental Studies are connected and discuss the history of our relationships with animals and the environment, our co-evolution, our impacts to animals and the environment, and their impacts on us. Students will use both biological and cultural approaches as they explore the many ways humans are connected to each other, to animals, and to their environments.

Animals and People

This course will introduce students to the various fields of human wildlife interactions in human evolution across cultures worldwide. We examine the role of animals in religious beliefs, traditional medicine, conservation, zoos and rehabilitation facilities, biomedical research, and human wildlife conflict management. We analyze how science is being used to address issues related to human-animal interaction, we explore aspects of hypothesis testing using data from the primary literature, and explore the change of methods over time and in different cultures.

Introduction to Environmental Studies: Humanities

In this course we will learn about what the Humanities are, as an interdisciplinary field, and how Humanities methods and research contribute to environmental thought and action. The class involves reading and research but also creativity and innovation. It is a lab in which we will think together about the possible futures of our stressed planet and how to harness imagination in the service of sustainability.

NEXT STEPS

After you're registered for your FIG, you will want to check out the Meet Your FIG page (<https://fyp.uoregon.edu/fall-2020-figs>). This page will have everything you need to know before the beginning of fall term, including how to email your FIG Assistant, if you have a summer assignment, and when you will be meeting your FIG for the first time in September. In order to prepare for your coursework and be notified about important academic deadlines you will want to download the "Canvas" and "Navigate" apps to your phone or any device you will be using. If you have questions about anything, make sure you email your FIG Assistant – they are here to help!
