ABOUT THIS FIG

College Connections

Since humanity's earliest history, very large volcanic eruptions have sometimes greatly impacted local populations or may even have contributed to the decline of whole civilizations. As writing was invented only about 4,500 years ago, the story of these cataclysmic events and other problems posed by the natural environment faced by hunter-gatherers came to us in the form of legends and stories. In this FIG we will travel back in time through stones and see how scientific and literary study can be combined to investigate what we can learn about past natural disasters from the traces they leave buried both in the ground and in cultural memory.

Volcanoes and Earthquakes

After a brief introduction to plate tectonics, this class will address how the Earth melts rock & makes volcanoes, why there is such a variety of volcanic types, and how volcanoes behave. This is followed by examining how faults make earthquakes and mountains, and how earthquake waves shake the ground and allow us to imagine the interior of the Earth. Many examples are taken from the Pacific Northwest, where all the different types of faults are active and where some of the largest earthquakes on Earth occur.

Origins of Storytelling

Why do humans tell stories? This course addresses this question by exploring the hunter-gatherer context in which storytelling emerged. Drawing on evolutionary theory and related disciplines, this course explores the origins of literature in terms of the information demands of ancestral human environments.

NEXT STEPS

After you're registered for your FIG, you will want to check out the Meet Your FIG page (<https://fyp.uoregon.edu/fall-2020-figs>). This page will have everything you need to know before the beginning of fall term, including how to email your FIG Assistant, if you have a summer assignment, and when you will be meeting your FIG for the first time in September. In order to prepare for your coursework and be notified about important academic deadlines you will want to download the "Canvas" and "Navigate" apps to your phone or any device you will be using. If you have questions about anything, make sure you email your FIG Assistant – they are here to help!
